

## **CHAPTER V**

### **CONCLUSIONS AND SUGGESTION**

The techniques of teaching reading in English at Elementary School that the teacher uses should be applied in various ways. They must do it to make children like reading and having a better comprehension. If pupils are interested in the material, they will want to read and learn it.

The level of reading material must be according to the learners' level, because, if the material is too difficult for the learners, it will make them unable to understand it. But, if the material is too easy for the learners, it will make them bored and unable to develop their reading skills. So, the teacher must prepare the teaching material that is suitable with the level of the learners. The teacher should know how to use the techniques and material to make the learners interested to learn the English lessons.

Therefore, the present writer is of the opinion that the theory of teaching reading should be applicable in class in order to improve the pupils' reading skills. In addition, the materials should be well graded and motivating.
