

## **ABSTRACT**

According to recent studies, the Internet is still growing at an extraordinary rate. It has magnificent impact in the growth of Information Technology, rapid development of online-games is one of real impact. Nowadays, there are many online-games in Indonesia which have thousands online player. As well as playing, players also need a group or community to share information and discuss about the games they played in a specific purposes website that commonly named Forum. There are many online-game Internet Forum in Indonesia, but almost all of them only focusing in single spesific game.

From the reason told above, writer decide to build Indogamers. Indogamers is a Forum that accommodates many online game's players to share information about many kind of popular online games. All features which implemented in Indogamers are gained by doing survey on several Online Game Center in Bandung. Indogamers uses the benefit of ASP.NET and Microsoft Access 2002 technology.

Differs from the others, as a Forum Indogamers accomodates almost all popular and high-rated online-games. This is an advantage to online-game players who are playing many online-game, because players only need to register once to get information and discuss about many kind of online-games supported in Indogamers.

This Final Assignment succeds to create a multigame web Forum named Indogamers which features requirement is obtained from doing survey from one hundred respondents. Among others, the main features are Forum with download page, private message between member and chat room.

For future development, Indogamers can implement encryption technique for sensitive data such as password and secret answer. Moreover, Indogamers also need to increase web access security which can prevent SQL injection and flood protection. And the last development plan is adding feature for managing members statistic data.
