

## INTISARI

Kemajuan di bidang teknologi informasi mengalami kemajuan seiring dengan meningkatnya kebutuhan informasi yang lebih baik dan efisien. Dengan kemajuan ini , pengelolaan pengumuman yang akan disampaikan kepada mahasiswa pada fakultas Teknologi Informasi yang awalnya dilakukan manual akan dikembangkan menjadi sebuah sistem pengumuman yang terkomputerisasi sehingga dapat menampilkan isi konten yang berbeda beda.

Program ini menyediakan beberapa fitur lain seperti pengolahan teks berjalan yang nantinya akan ditampilkan pada bagian bawah layar ,selanjutnya ada teks statik yang akan ditampilkan pada bagian kanan layar ,lalu pengaturan logo yang nantinya akan ditampilkan pada layar pengumuman, ada juga pengaturan gambar-gambar yang nantinya akan ditampilkan pada layar utama sebagai pengumuman dan juga pemutaran video yang dapat diatur.

Sistem pengumuman ini akan nantinya akan dibuat menjadi aplikasi *desktop* yang efisien Kesimpulannya keuntungan-keuntungan yang akan diberikan aplikasi ini kepada penggunanya adalah adalah kemudahan untuk memberikan pengumuman kepada mahasiswa-mahasiswa fakultas Teknologi Informasi dalam bentuk yang jauh lebih menarik sehingga diharapkan dapat membuat sistem pengumuman ini menjadi lebih efisien dan bermanfaat.

## **ABSTRACT**

*Advances in information technology are progressing in line with the increasing need for better information and efficient. With these advances, the management of announcements that will be delivered to students at the faculty of Information Technology which was originally performed manually will be developed into computerized system that can display content that is different and can be presented in a form that more attractive. With its application there is then the user can process a lot of digital notice board as well as monitor the activities of the display screen is periodically announcement.*

*This program provides several other features such as running text processing , then there is static text to be displayed on the right side of the screen ,then setting a logo that will be displayed on the announcement, there are also setting the images will be displayed on the main screen as well as announcements and video playback can be set.*

*This announcement system will later be made into an efficient desktop applications. In conclusion the benefits to be provided to the users of these applications is the ease to make an announcement to students faculty of Information Technology in a far more interesting than the announcement besides the system also may contain content that varies is expected to make this announcement systems become more efficient and beneficial.*
