

Abstract

The Aspek about methods of recyling at TPA Pasir Impun In order to realize balance and healty environment

Ariel Timy Chiprion, 2006. Tutor I : Felix Kasim,dr,M.Kes

In order to realize balanceand healty environment, in region TPA Pasir Impun, it is important to observe about metodes of whole disposel in “TPA Pasir Impun”, “TPA Pasir Impun” have been operated starting from 1987. It main purpose is how the metode of whole disposel “TPA Pasir Impun” and the disease that occurred in local citizen around “TPA Pasir Impun”.

The aim for this research is to provide information about methods of at whole disposel “TPA Pasir Impun”.

This research is like the research of quality, it may use deep interview techniquial. Which sample is “whole sample” with method to interview all of employer of “TPA Pasir Impun” (it may use 3 employer), and 15 employer from local citizen. Sampling techniquial for use is non probabability sampling which using accidental sampling.

Those method for “TPA Pasir Impun” including sanitary landfill, and compos. Methode of whole disposel at “TPA Pasir Impun”, have been worked in good performance, but unfortunately it must follow by increasing the service “TPA Pasir Impun” of employer, for employer and local citizen. Local citizen giving complains which are odor from garbage the decreased qualytif of clean water, and also fails. The disease may have occurred employers and local citizen, commenly lightly symptoms and thia is no conection from pile of garbage TPA Pasir Impun.

The method of whole disposel “TPA Pasir Impun”, have been worked in good performance, but it must follow by increasing the service of employer, and it will need new landfill opening more wide than far from other local citizen and it will need more marketing in “kompos” to agriculture.
