

ABSTRAK

Teknologi dan informasi merupakan kesatuan yang terkait satu sama lain. Perkembangan teknologi yang meningkat baik disisi perangkat keras atau perangkat lunak dikarenakan kebutuhan informasi dan pertukaran data cepat, mudah dan juga bisa dilakukan di mana saja dan kapan saja.

Website pengumuman Fakultas Teknologi Informasi adalah tempat mendapatkan informasi dan data berkas penting untuk kuliah, jurusan dan fakultas. Jika diakses dengan menggunakan internet browser pada mobile maka tampilan tidak rapi dan tidak gampang dibaca, hal tersebut dikarenakan website pengumuman Fakultas Teknologi Informasi masih mendukung versi mobile. Merancang dan membangun aplikasi android dengan memanfaatkan REST webservice, server dan client dapat berinteraksi dimana server akan menyediakan sumber data dan client menggunakan sumber data tersebut. Pengguna dapat dengan mudah mengakses data dan informasi yang ada di website dengan cepat.

Aplikasi ini dibangun berharap dapat berguna bagi pengguna, khususnya untuk mahasiswa Kristen Maranatha universitas. Aplikasi yang dikembangkan dengan menggunakan teknologi Android sehingga dapat digunakan di mana saja dan kapan saja dengan menggunakan smartphone Android.

Kata kunci : Android, Informasi, REST, Smartphone, Teknologi, Webservice

ABSTRACT

Technology and information is an unity which related one to another. The development of technology which increased rapidly either hardware or software because of the need of information and exchange of data quickly, easily and also can be done anywhere and anytime.

Website announcements Faculty of Information Technology is the place to get information and data files essential for college, majors and faculty. If user access by using internet browser on mobile phone, display is not neat and not easy to read, it is because the website announcements Faculty of Information Technology have not support mobile version. Designing and building a android application by using REST webservice, server and client can interact where server will provide the resources and client consuming the resources provided by server. Users can easily access the data and information available on the website quickly.

This application build so hope can be useful for people in generally and especially for Maranatha Christian university students. The application developed by using Android technology so can be use anywhere and anytime by using Android smartphone.

Keyword : Android, Information, REST, Smartphone, Technology, Webservice
