

ABSTRACT

The advance in technology that is going rapidly also affect the development of mobile devices nowadays, so the mobile devices are become sophisticated and very helpful. The development really helps in presenting fast and efficient information with features of mobile devices such as wireless connection and barcode service. PT Akur Pratama currently feels they have efficiency problems in managing goods which is still done manually. The display goods often lost (moved to other place), some of the price lists are missing, etc. These will make the performance of employees become slower. From the problems above, PT Akur pratama create a real time application called Operational Store Mobile Application which can help the staffs to manage the goods and good's information in the store as well.

Keyword : Mobile operational ,operational store, stock management
