

## **ABSTRACT**

Medical Faculty is one of faculties in Maranatha Christian University which uses SAT (Sistem Akademik Terpadu – Integrated Academic System) to process & manage their lecturing system. The Medical Faculty changed their lecturing system to Competence based curriculum since 2006.

Competence based curriculum divides related subjects into a group which is called 'Block'.

With the changes of learning system in Medical Faculty become to Competence based, there is a need for a new application in handling the system.

The purpose of this application is to help the Medical faculty staffs in processing student's grades, arranging student's schedules, and other related study activities. This application is also developed to ease students arranging their subjects in the next semesters, arranging their leaves, and also displaying their study schedule and grades.
