

## **ABSTRACT**

The improvement of information technology sector has been increased over the growing demand in the life, which is easier, more efficient, and more secure. The transition of information systems, which originally based on manual and become computerized, have been utilized by church to convey information to the congregation.

This Simple Presentation is an application which is created using the programming language C# combined with SQL Server 2005 database as the storage media. This Simple Presentation application aims to help the operators or church multimedia users in convey information such a form of composition in a church ceremony. The form of composition in a church ceremony can be a text track, video, biblical verses, and also powerpoint that will be shown to the congregation. Beside that Simple Presentation application can help in data processing, such as adding new data (adding text track files, video files, and background display), deleting unnecessary data, and changing the data which the user want to change. The Simple Presentation have others features, such as template feature that useful to make an arrangement of events that can be used at anytime, event feature to remind operators about the event, quick edit features to change text quickly.

*keywords: Simple Presentation, C#, SQL Server 2005 database, multimedia users, template feature, event feature, quick edit feature*

## **ABSTRAK**

Kemajuan di bidang teknologi informasi semakin hari semakin meningkat seiring berkembangnya permintaan akan hidup yang lebih mudah, efisien, aman. Peralihan sistem informasi yang semula berbasis manual menjadi terkomputerisasi ini banyak dimanfaatkan oleh beberapa gereja untuk menyampaikan informasi kepada jemaatnya.

Aplikasi *Simple Presentation* adalah aplikasi yang dibuat dengan menggunakan bahasa pemrograman *C#* yang digabungkan dengan *database SQL Server 2005* sebagai media penyimpananya. Aplikasi *Simple Presentation* ini bertujuan untuk membantu operator atau pengguna multimedia gereja dalam hal menyampaikan informasi yang berupa susunan acara dalam sebuah gereja. Susunan acara tersebut dapat berisi susunan teks lagu, video, ayat alkitab, dan juga *Power Point* yang akan ditampilkan kepada jemaatnya. Selain itu aplikasi *Simple Presentation* dapat membantu dalam pengolahan datanya seperti menambah data baru (menambah *file* teks lagu, file video, menambah *background* tampilan). Menghapus data yang tidak diperlukan, serta merubah data yang ingin diubah. Aplikasi *Simple Presentation* memiliki fitur lainnya seperti fitur *template* yang berguna untuk membuat sebuah susunan acara yang dapat digunakan kapanpun, fitur *event* untuk mengingatkan operator akan adanya *event*, fitur *quick edit* untuk merubah teks dengan cepat.

Kata kunci: *Simple Presentation*, *C#*, *database SQL Server 2005*, pengguna multimedia, fitur *template*, fitur *event*, *quick edit*
