

ABSTRACT

Tecnology development lately has become a very important factor in every companies in this world. Having a management system which is well arranged in structure, well documented, has a good administration system is important for a company. diAVisko is one of the answer for automotive industries nowadays. The objective of this report is as diagnosis function. diAVisko evaluated in this report is diAVisko ver. 1.9.2

diAVisko ver. 1.9.2 has 9 features of menu, which are: Datei, Bearbeiten, Ansicht, Übersichten, DCM, Hilfe, Datensätze, Extras, and Window. Each menu has itself function and data input is the first important thing to do before using these menus. The test function menu is developed and became one of this application functions.

This application has reading and handling-databank functions, which will then result an output that is useful for diagnosis process. This system has a simple interface design which will make them easier to be used.

Every menu in this application is related to each other and has a good function, mainly in menu datei which is used for data input, so that all the available menus can be used for diagnosis process. Overall this application is very useful to help doing the diagnosis process of a vehicle. This application is still in development stage.

Keywords : diAVisko and diagnosis.

TABLE OF CONTENT

Form of Verification.....	ii
Statement of Originality of Report	iii
Form of Agreement.....	iv
Acknowledgement	v
Abstract	vi
Table of Content	vii
List of Figures	ix
List of Tables	x
List of Appendices	xi
I. Product Requirement.....	I-1
I.1. Introduction.....	I-1
I.1.1. Objective.....	I-1
I.1.2. The scope of project.....	I-1
I.1.3. Definition and acronym	I-2
I.1.4. The outline of the report.....	I-3
I.2. The Description of Whole System	I-3
I.2.1. Product perspective	I-3
I.2.2. Product function	I-4
I.2.3. The characteristic of user	I-4
I.2.4. Limitation of cases	I-6
I.2.5. Assumptions and dependency	I-6
I.2.6. Postpone of requirement.....	I-6
II. Product Specification	II-1
II.1. External Interface Requirements.....	II-1
II.1.1. User interface.....	II-1
II.1.2. Hardware interface.....	II-1
II.1.3. Software interface	II-2
II.1.4. Communication interface.....	II-2
II.2. Features of software product	II-3
II.2.1. Feature of inputting data	II-3
II.2.2. Feature of editing data	II-3
II.2.3. Feature of processing data	II-3
II.2.4. Feature of testing menu	II-4
III. Software Design.	III-1
III.1. Introduction.....	III-1
III.1.1. Identification of System Requirements	III-1
III.1.2. System Overview	III-1
III.2. Determination of Designing the Software Thoroughly	III-2
III.3. Architecture Design of the Software	III-5
III.3.1. Software components	III-5
III.3.2. Concept of execution	III-6
III.3.2.1. Activity Diagram	III-6
III.3.3. Design of interface	III-11
III.3.4. Implementation Result.....	III-15
IV. System Development	IV-1
IV.1. Plan of Implementation Step	IV-1
IV.1.1. Implementation of module/ procedure/ class classification.....	IV-1
IV.1.2. Inter-modules relationship	IV-2

IV.2. Details of Implementation Step	IV-2
IV.2.1. Top-down implementation.....	IV-2
IV.2.2. Debugging	IV-4
IV.2.3. Discussion of function realization.....	IV-5
IV.2.4. Discussion of User Interface Realization.....	IV-8
V. Test and Evaluation Of The System	V-1
V.1. Plan of Testing the Implemented System	V-1
V.1.1. Test case.....	V-1
V.1.2. Functionality test of the software components	V-1
V.2. The Details of Test Methodology	V-2
V.2.1. White box	V-2
V.2.2. Black box.....	V-2
V.3. Discussion of Evaluation Result.....	V-4
VI. Conclusion and Suggestion	VI-1
VI.1. Relationship between Conclusion and the Result of Evaluation.....	VI-1
VI.2. Relationship between Suggestion and the Result of Evaluation.....	VI-1
VI.3. Improvement and Implementation of the Suggestion	VI-2
