

ABSTRACT

Now days, the growth in society are really fast. This growth includes many fields like industries, economic, technology, and etcetera. In all that fields, the company survival rely on information sharing. To survive in Global Era, a company is demanded to have a really fast information sharing. GPRS (General Packet Radio Service) is the Service that allows people to share information. With this Service, customers can attain information really fast with only using their hand gadget. And the owner or staff can see and manage the company in long distance. This Service could actually improve the management in the company and could make a benefit in shorting management time. As a student work in information technology division, the Writer had been given tasks. The task was to make an accounting system program that supported with a GPRS technology in selling and report management. This system hoped to make easy for the customers to buy things in the company, and for the owner to maintain the company in long distance. The final tasks was to implement an accounting system to make an effectively for management. The task above will be described more on the following chapter.

Keyword:

- *Accounting System*
- *GPRS (General Packet Radio Service).*
