

ABSTRAK

MOREBE merupakan salah satu perusahaan *software house* di Bandung yang bergerak di bidang *Information Technology*. Perkembangan *Information Technology* yang sangat pesat terbukti dengan semakin banyak pihak yang menggunakan jasa perusahaan *software house* dalam membangun suatu sistem informasi yang berbasis *Information Technology*. Dalam kasus ini *client* seperti perusahaan ataupun individu banyak terbantu dengan adanya perusahaan *software house*. Dimana perusahaan tersebut dapat memberikan solusi dari permasalahan. Saat ini perusahaan tersebut belum memiliki suatu aplikasi yang dapat mengolah data-data keseluruhan *project* aplikasi yang telah ditangani sampai saat ini, sehingga diperlukan sebuah aplikasi Sistem Informasi Management *Project* Dan Pengarsipan *File* berbasis web untuk perusahaan tersebut. Dimana aplikasi ini akan menyimpan data-data *project* yang akan ataupun yang sudah ditangani oleh perusahaan. Sehingga perusahaan akan dapat dengan mudah mengelola *project* yang sedang ditangani. Perangkat lunak yang digunakan untuk mendukung pembuatan aplikasi ini yaitu bahasa pemrograman PHP dan MySQL untuk mengelola *database*.

Kata Kunci : Sistem Informasi, *Management Project*, *Web*, PHP, MySQL

ABSTRACT

MOREBE is one of the software houses in Bandung working in the field of Information Technology. The development of Information Technology is very rapid as evidenced by the many people who use the company's services software house in building an information system based on Information Technology. In this case the company or individual client as much helped by the company's software house. And the company is able to provide a solution of the problem. Currently the company does not yet have an application that can process data on the overall project applications have been addressed to date, so we need Application Project Management Information System web-based And File Archiving for the company. The application will store data project that will be handled by the company. So the company will be able to easily manage the project at hand. The software device that we will use to support the creation of this application is the PHP programming language and the MySQL for managing database.

Keyword: Information System, Project management, PHP, MySQL
