

ABSTRACT

Easy vacation is a website or a system with C2C business model in purpose to handle property rent problem between customer. With implementation of private message system between customer, hopefully every customer can share information to each other easier. There is another system such as automatic email notification which optimize sending data service to customer. To keep data in secure from hacker or inconsistency, there is automatically back-up feature in a certain period. Theories in used are Java Enterprise 6, MySQL 5, Flowchart, ERD, and UML. The data sources is taken directly from the field. With the system, property rent process would be more easier to easy vacation's member.

Keyword : Property Information System, E-commerce C2C Application, Java Enterprise Application.

ABSTRAK

Easy vacation adalah sebuah website atau sistem dengan bisnis model C2C untuk menangani masalah penyewaan properti antar konsumen. Dengan mengimplementasi sistem penukaran pesan antar konsumen, diharapkan setiap konsumen dapat dengan mudah saling bertukar informasi dengan konsumen lainnya. Terdapat juga sistem notifikasi *email* secara otomatis yang mengoptimalkan layanan pengiriman data kepada konsumen. Untuk menjaga keamanan data dari kehilangan ataupun ketidak konsistenan, maka terdapat fitur *back-up* secara berkala yang berjalan secara otomatis. Teori yang digunakan antara lain *Java Enterprise 6*, *MySQL 5*, *Flowchart*, *ERD*, dan *UML*. Sumber data didapatkan dari hasil pengamatan langsung oleh penulis di lapangan. Dengan dibuatnya sistem ini, maka diharapkan dapat membantu *member easy vacation* dalam melakukan proses penyewaan properti.

Kata kunci : Sistem Informasi Properti, Aplikasi *E-commerce C2C*, Aplikasi Java Enterprise.
