

## **ABSTRAK**

Aplikasi *website Job Matching* merupakan aplikasi pengelolaan lowongan pekerjaan dan pencocokan cv (*curriculum vitae*) pelamar kerja berdasarkan kebutuhan dari pemberi kerja. Pemberi atau company dapat mencari cv yang sesuai dengan kebutuhan yang diperlukan oleh perusahaan. Metode scoring digunakan untuk mencari cv yang cocok atau mendekati dengan kebutuhan perusahaan. Pemberian skor terdapat pada beberapa field pada template cv yang sudah tersedia dalam aplikasi website job matching. Pemberian skor dilakukan secara manual oleh company. Hanya admin company saja yang dapat melihat hasil dari pencocokan cv. Pelamar kerja atau jobseeker dapat melamar pekerjaan dan mengisi cv yang tersedia pada aplikasi website job matching. *Tools* yang digunakan untuk membuat aplikasi ini adalah Eclipse, sedangkan untuk bahasa menggunakan Java Server Page dan Tomcat sebagai server.

Kata kunci : job matching, job portal, java server page

## **ABSTRACT**

*Job Matching website application is an application management cv (curriculum vitae) matching job vacancies and job applicants based on the needs of the employer. Giver or the company may seek cv in accordance with the needs required by the company. Scoring method used to find a suitable cv or close to the company's needs. Scoring contained in several fields in the template cv that already available in job matching website application. Scoring is done manually by the company. Only company's admin who can see the results of the matching cv. Job applicants or jobseekers can apply for jobs and filling cv available on job matching website application. Tools used to create this application is the Eclipse, while for languages using Java Server Page and Tomcat as server.*

*Keyword: job matching, job portal, java server page*
