

## CHAPTER IV

### CONCLUSION

The problem of my term paper is I had difficulty in teaching English to 6<sup>th</sup> grade students in SDN Cijawura. There are three causes of my problem, namely the students were absolute beginners in learning English, the school did not provide any English course book for me to teach English, and I did not have any experience in teaching children. The effect of my problem is I had to review the materials over and over again, the students could not understand the materials, so they had low mark on the test. There are three potential solutions to solve the problem. The first potential solution is I will use games to teach the students. The second potential solution is I will use role-play in the class. The last potential solution is I will use teaching aids such as pictures, films, and songs to teach the students.

Based on the analysis in the previous chapter, I would like to choose all three of the potential solutions to solve my problem because the combination of all of them will create a variety of effective teaching. The first solution is I will use games to teach the students. Most of the students will understand about the materials if I teach English with some games.

The second potential solution is I will use role-play in the class. From that activity, the students will be more motivated to learn English, because the students can explore their expression when doing the role-play. The third potential solution is I will use teaching aids such as pictures, films, and songs to teach the students. The students will enjoy the lesson if they see the films, listen to English songs, or see the pictures.

Combining the three solutions will be fun and interesting for the students to learn English with passion. To sum up, using fun activities, suitable materials and relevant teaching aids will be effective to help the sixth grade students at SDN Cijawura to learn English better than before. I expect that the solutions will help other teachers who have this similar problem as well.
