ACKNOWLEDGEMENTS

First and foremost, I would like to express my highest gratitude to Allah SWT for blessing, love, opportunity, health, and mercy to complete this thesis. Thank you for giving me wisdom and strength so that I am able to finish my thesis.

In arranging this thesis, a lot of people have provided motivation, advice, and support for me. In this valuable chance, I intended to express my gratitude and appreciation to all of them. This thesis would not have been possible without the help, support and patience of my only advisor Bernadette Santosa, S.S., M.A for his supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the past few years.

I am profoundly grateful to my beloved parents. Thank you for the endless love, pray, and support, thank you for reminding me to keep going and never giving up. Your supports magically give me reason to be focus to finish my study as soon as possible, for that I am really grateful to have you two in my life.

I would like to say thanks to the following friends for their continued support and friendship: Restiayu, Pattas Pattar, Cindy Alviyunita, Cindy Zahra, Rambu, and Antonieta. And my special thanks go to Sammy Syauta. You are always a good listener for every problem I faced, especially when I had to revise this thesis and re-start over and over again. Your oppinions never stop surprise me and also allow me to see my problem from a different angle.

Finally, I would like to thank everybody who was important to the successful realization of this thesis.
