

CHAPTER IV

CONCLUSION

In this chapter, I will discuss the best solutions to overcome my problem which was handling the aggressive behavior of nine students at class 5C at SD Santa Ursula Bandung. There are three causes of the problem. The first cause is I had no experience in handling issues related to classroom management especially in dealing with aggressive students in the class. The second cause is I was not assertive enough in handling the students. The third cause is there was no clear system about rules in the class. There are three effects of the problem. The first effect is I felt pessimistic in teaching the students. The second effect is the class became very noisy and out of control. The third effect is the discussion of material in this class was slower than the other classes. There are three potential solutions of my problem. The first potential solution is I will set the classroom rules and the system of rewards and consequences. The second potential solution is I will be assertive in handling the students. The third potential solution is I will do a collaborative team teaching with an experienced teacher.

Based on the analysis, I will choose all of the potential solutions to solve this problem. The reason why I choose to combine these three potential solutions

is because I believe that by combining them, I will be able to handle similar problem in the future properly. The problem will not be solved if I only choose one or two of them. These three potential solutions are related with each other and needed to solve the problem. Firstly, I will apply the first potential solution by creating and applying the classroom rules with the system of rewards and consequences. After that, I will apply the second potential solution by being assertive in handling the students. After the first two solutions applied, I will apply the third potential solution by asking an experienced teacher to do the collaborative teaching together.

By applying these three potential solutions appropriately, I hope it will help the nine aggressive students at class 5C at SD Santa Ursula to learn and behave appropriately. Furthermore, I hope that I will be able to handle the similar problem in the future.
