

ABSTRAK

Penelitian ini bertujuan untuk melihat hubungan attachment to parent dan attachment to God pada anggota komunitas sel 'Superheroes' di Gereja 'X' Bandung. Populasi sebanyak 60 orang diikutsertakan dalam penelitian ini.

Alat ukur yang digunakan adalah Attachment to God Inventory (AGI) oleh Beck & McDonald (2004) dan Experience in Close Relationship-Revised (ECR-R) oleh Fraley, Waller & Brennan (2000) yang diterjemahkan oleh Elgi (2016). Pada alat ukur AGI diperoleh 26 item valid dengan kisaran 0,389 – 0,723, pada ECR-R diperoleh 33 item valid dengan kisaran 0,304 – 0,849. Reliabilitas AGI dimensi avoidance of intimacy sebesar 0,876 dan dimensi anxiety about abandonment sebesar 0,841, reliabilitas ECR-R dimensi avoidance sebesar 0,909 dan dimensi anxiety sebesar 0,828. Korelasi kedua variabel diuji dengan menggunakan canonical correlation analysis dengan program SPSS 20.

Berdasarkan pengolahan data, ditemukan bahwa antara attachment to parent dan attachment to God terdapat korelasi yang moderat dan positif (nilai koefisien korelasi kanonik = 0,49097, nilai varians dari korelasi = 98,9 %, nilai eigen = 0,31762). Bagi yang ingin meneliti lebih lanjut disarankan untuk meneliti kontribusi dari dimensi attachment to parent terhadap dimensi attachment to God. Pemimpin komunitas sel 'Superheroes' di Gereja 'X' Bandung dapat menggunakan informasi dari penelitian ini untuk memotivasi perkembangan spiritualitas dalam diri anggota komunitas sel 'Superheroes'.

Kata Kunci : anggota komunitas sel 'Superheroes', attachment to God, attachment to parent

ABSTRACT

The research was conducted to examine the correlation between attachment to parent and attachment to God on Member of 'Superheroes' Cell Community in 'X' Church Bandung. Population of 60 people was asked to join this research.

Attachment to God Inventory (AGI) developed by Beck & McDonald (2004), that has been translated by Bakara (2014) and Experience in Close Relationship-Revised (ECR-R) by Fraley, Waller & Brennan (2000) that has been translated by Elgi (2016) are used as the measurement tools. After validity testing, obtained 26 valid item for the AGI that ranged from 0,389 – 0,723, while for the ECR-R, obtained 33 valid item that ranged from 0,335 – 0,825. The reliability is 0,876 for AGI avoidance of intimacy dimension, 0,841 for AGI anxiety about abandonment dimension, 0,909 for ECR-R avoidance dimension, and 0,828 for ECR-R anxiety dimension. The correlation of this two variable was tested using canonical correlation analysis in SPSS 20.

Based on data processing, obtained that between attachment to parent and attachment to God there is a moderate and positive correlation (the value of canonical correlation coefficient = 0,49097, the value of variance of correlation = 98,9%, eigen value = 0,31762). For those who want to do a further research, researcher suggested to do research about contribution from the dimension of attachment to parent to the dimension attachment to God. The cell leaders of the 'Superheroes' Cell Community in 'X' Church Bandung, they can use this information to motivate the development of spirituality in the members of the 'Superheroes' cell community in 'X' Church Bandung.

Key Words : *member of 'Superheroes' Cell Community, attachment to God, attachment to parent*
