ACKNOWLEDGEMENTS

First of all, thanks to Allah Almighty, who enables me to do some research and gives me the strength both mentally and physically. Without his grace I would not be able to finish this thesis in good health with clear mind. Also, I would like to express my eternal appreciation and love for my parents, who never stop believing and supporting me both financially and passionately, which makes me more passionate in doing this thesis.

My heartiest gratitude are for my best supervisors, Dr. Trisnowati Tanto, M.Hum., and Cheryl Groth, M.Ed., who have given invaluable guidance, help, encouragement and support along the process of writing this thesis. Even though I found some difficulties when completing this thesis, thanks to them, I could manage to finish it. Furthermore, I am deeply indebted to my academic counselor, Dra. Melly Kosasih, M.Si., who always listens and gives me emotional support as well as motivation.

Moreover, my cordial love is given to my best friends, who know how many times I cried and almost gave up on things, but said I could make it through. They are Yuliana, Okky, Ilham, Rafdy, Rizky Pratama, Rora, Osy, Pattas Patar, and some others that I cannot mention one by one.
