

## CHAPTER IV

### CONCLUSION

The problem of my term paper is I had difficulty in handling the misbehavior of ten children in the 1C class at SDN Griba 27. There are three causes of my problem, namely I lacked of experience in teaching and handling the children, there were no classroom rules, I lacked of assertiveness in dealing with children. The effects of my problem are I feel stressed and tired, the class was noisy, the misbehaved children disturbed the other children. There are three potential solutions to solve the problem. The first potential solution is I will impose rules, consequences, and rewards. The second potential solution is I will be assertive with the children. The last potential solution is I will find some senior teachers to be my mentors.

Based on the analysis in the previous chapters, I will choose all of the potential solutions to solve my problem because the combination will be effective to solve my problem in dealing with the misbehaviour of the children. First, I will impose rules, consequences, and rewards. If I use this solution, my teaching will run effectively because the class atmosphere will be positive. Next, I will be

assertive with children. If I am assertive with the children, the class will become calm and the disruption in class will be reduced. Third, I will find some senior teachers to be my mentor. As a novice teacher, I should learn from my mentor how to become a professional teacher.

Combining the three solutions will be effective and efficient to teaching in 1C class. I expect that the solutions will help other teachers who have similar problem as well.
