### DESIGN OF INTERIOR CERVIXMEDICA (HEALTHY HOME OF CERVICAL CANCER)

By:

Natasia Ratih Setiamiharja (1463074)

The purpose of this design project is to create a comfortable cervical cancer clinic and meet the needs of patients through a complete facility. This cervical cancer clinic is devoted to women. Background of Cervixmedica or cervical cancer clinic is incomplete facilities that exist in the clinic as well as lack of cervical cancer treatment site. Most cancer in Indonesia is cervical cancer this is due to lack of medical place and lack of public awareness to do early checking. People do not want to check because the room is too stressful that makes people afraid to check.

With the presence of Cervixmedica is expected to make the clinic visitors more comfortable and relaxed. Cervixmedica eliminates the formal impression attached to the clinic, through a modern concept.

Keywords : clinic, cervical cancer, women, comfortable.
