ACKNOWLEDGMENTS

First of all, I would like to thank God for His amazing grace so that I can finish this thesis. Without His amazing grace, everything would not happen.

I would like to express my deepest gratitude to my first supervisor, Hendra Liem, S.S., M.Hum., who always gives me suggestions, criticisms, guidance, and help from the beginning to the completion of my thesis. I would also like to express my deepest gratitude to my second supervisor, Joanna Deborah, S.S., M.Hum., who always patiently checks my grammatical mistakes. I would like to give my appreciation to Maryani, S.S., M.A. for her willingness to be the object of my research.

I would like to thank my parents, who give me financial support and never-ending prayers, as well as my second family, START community, who always prays for me and supports me. I would also like to thank my best friends - Angel, Nanda, and Natalia - who always give me support and encourage me to finish this thesis quickly, and also my college best friends - Tiara, Kiki, Debbie, and Vidya - who always give me a reason to smile even when I am down. To my closest friends, Akito and Yuka, I also thank you for your support and unconditional love during the thesis writing process. Last but not least, I would like to thank all my friends,

who I cannot mention one by one, for giving me much support and help. Without all of you, I would not have been able to finish this thesis well.
