Journal: Heliyon

Dear Mr. Setiawan,

Thank you for submitting your manuscript to Heliyon. Before we begin the review process for your manuscript, we perform an initial check against formal criteria. We regret to inform you that your manuscript does not meet the Journal's required standard. Please make changes/corrections as detailed in the comments below. Furthermore, please note that from January 2023, we have switched to a Numbered reference style, and we kindly request you to update the references in your manuscript accordingly. To submit your updated manuscript, please log in as an author at <https://www.editorialmanager.com/heliyon/>, and navigate to the "Submissions Needing Revision" folder under the Author Main Menu. Your revision due date is Jan 18, 2023.

If you need additional time to address the concerns that came up in the review process, please let us know so we can discuss a plan for moving your paper forward.

I look forward to receiving your updated manuscript.

Kind regards,

Apoorva Singh

Comments:

Dear authors, thank you for your submission to the journal. While this is a relevant study on an important topic, there are some points that need to be reviewed in depth before submitting the

manuscript for peer review:

- 1- The process of translation and adaptation of the original version should be further clarified and justified. In particular, how was the substantive evidence or content validity of the resulting translation-adaptation assessed?
- 2- It should be specified in sufficient detail how the sample was subdivided for the purposes of the EFA and CFA.
- 3- It should be justified and explained why it was necessary to carry out a consecutive EFA and CFA.
- 4- The rationale for other procedural decisions, such as the adjustment criteria followed, the estimation method in EFA and CFA, the type of rotation and determination of the number of factors in EFA, should be explained in sufficient detail.
- 5- It should be specified in the main manuscript or an appendix how the statistical procedures were followed, this includes detailing the steps followed in the statistical programme and/or making explicit the codes implemented to run the analyses in the context of the selected programme.

I look forward to your answers and to the amended report. Thank you very much.

Journal: Heliyon

Dear Mr. Setiawan,

We have now received all of the reviewers' comments on your recent submission to Heliyon.

The reviewers have advised that your manuscript requires revisions prior to being considered for publication.

If you are able to address the reviewers' comments, which you can find below, I would like to invite you to revise and resubmit your manuscript. We ask that you respond to each reviewer comment by either outlining how the criticism was addressed in the revised manuscript or by providing a rebuttal to the criticism. This should be carried out in a point-by-point fashion as illustrated here:

Your revision due date is Jul 24, 2023.

We understand that the COVID-19 pandemic may well be causing disruption for you and your colleagues. If that is the case for you and it has an impact on your ability to make revisions to address the concerns that came up in the review process, please reach out to us.

If you need additional time to address the concerns that came up in the review process, please let us know so we can discuss a plan for moving your paper forward.

I look forward to receiving your revised manuscript.

Research Elements (optional)

This journal encourages you to share research objects - including your raw data, methods, protocols, software, hardware and more – which support your original research article in a Research Elements journal. Research Elements are open access, multidisciplinary, peer-reviewed journals which make the objects associated with your research more discoverable, trustworthy and promote replicability and reproducibility. As open access journals, there may be an Article Publishing Charge if your paper is accepted for publication. Find out more about the Research Elements journals at

Reviewer's Responses to Questions

1. Are the objectives and the rationale of the study clearly stated?

 Please provide suggestions to the author(s) on how to improve the clarity of the objectives and rationale of the study. Please number each suggestion so that author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved Yes, there is no need for improvement

Provide further comments here: From a scientific person who knows psychometrics can only understand with much effort. This study's writings are not well coherent to the objectives and dispersed literatures are arranged in the Background of the study. The authors should follow simple language, define the terms for later use and more focus should be given in the flows of Background. I would like to suggest authors to revise the Background from global issues to local and then why the psychometric properties are required. Moreover, concrete theoretical back should be given to

support the rationale. The authors can use each of the paragraphs for each issue that narrows down to the objectives.

2. If applicable, is the application/theory/method/study reported in sufficient detail to allow for its replicability and/or reproducibility?

Please provide suggestions to the author(s) on how to improve the replicability/reproducibility of their study. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved [X] Yes, there is no need for improvement

Provide further comments here: Hardly recognize any theory incorporated for backing the rationale as well as objectives. I would like to suggest making a different subsection where the authors can provide theoretical support.

Moreover, the sample selection process should be clear. How authors collect the sample and how they determine the sample. As a rule of thumb, there are some criteria for selecting samples for EFA or CFA. Please check those rule of thumb and explain, is the sample sufficient for the EFA and CFA. Moreover, the KMO and Bartlet test are mentioned in the table but there is no interpretation found in the text.

The reason of using FA is well known, the authors are asked to show it for their objectives irrespective of the basic description of FAs.

3. If applicable, are statistical analyses, controls, sampling mechanism, and statistical reporting (e.g., P-values, CIs, effect sizes) appropriate and well described?

Please clearly indicate if the manuscript requires additional peer review by a statistician. Kindly provide suggestions to the author(s) on how to improve the statistical analyses, controls, sampling mechanism, or statistical reporting. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved [X] Yes, there is no need for improvement

Provide further comments here: I would like to request to clarify the sampling methods for this study. Besides the process, authors described for selecting the study sites can produce biases. Please provide the statements that how authors reduce those site selection biases. Moreover, the constructs are adopted or adapted (adopt-adapt) or newly developed should be cleared. Moreover, the statistical tools for the analyses should be mentioned. However, the attached codebook clarifies that authors used SPSS and AMOS.

4. If applicable, are the existing tables and/or figures complete and acceptable for publication?

Please provide specific suggestions for improvements, removals, or additions of figures or tables. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved [X] Yes, there is no need for

improvement

Provide further comments here: I would like to suggest authors to reconstruct the tables according to APA (most acceptable format) for psychology and social sciences. These new forms of tables are not very catchy for scientific audience.

5. If applicable, are the interpretation of results and study conclusions supported by the data?

Please provide suggestions (if needed) to the author(s) on how to improve, tone down, or expand the study interpretations/conclusions. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved Yes, there is no need for improvement

Provide further comments here:

6. Have the authors clearly emphasized the strengths of their study/theory/methods/argument?

Please provide suggestions to the author(s) on how to better emphasize the strengths of their study. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved Yes, there is no need for improvement

Provide further comments here: Please provide a sub-section for the strengths/theory and arguments of your findings.

7. Have the authors clearly stated the limitations of their study/theory/methods/argument?

Please list the limitations that the author(s) need to add or emphasize. Please number each limitation so that author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved Yes, there is no need for improvement

Provide further comments here: Please provide them in a sub-section in the discussion or at the end of the discussion. You can also provide it in conclusion. But, if the limitations are many, please make a separate sub-section.

8. Is the manuscript's structure, flow, or writing acceptable for publication? (Think for example of the addition of subheadings, shortening of text, reorganization of sections, or moving details from one section to another)

Please provide suggestions to the author(s) on how to improve the manuscript structure and flow. Please number each suggestion so that author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Not Applicable No and here is how they should be improved Yes, there is no need for

improvement []

Provide further comments here: Flows of the writing are hardly noticeable. I recommend a major revision. Please use simple language and simple sentences. Make sure the readability of the manuscript is in range for a normal scientific person.

9. Could the manuscript benefit from language editing?

Reviewer #1: Yes

Title: Psychometric properties of Indonesian slums dwellers' place attachment

Journal: Heliyon

Dear Mr. Setiawan,

Thank you for submitting your manuscript to Heliyon.

I am pleased to inform you that your manuscript has been accepted for publication.

Your accepted manuscript will now be transferred to our production department. We will create a proof which you will be asked to check, and you will also be asked to complete a number of online forms required for publication. If we need additional information from you during the production process, we will contact you directly.

We appreciate and value your contribution to Heliyon. We regularly invite authors of recently published manuscript to participate in the peer review process. If you were not already part of the journal's reviewer pool, you have now been added to it. We look forward to your continued participation in our journal, and we hope you will consider us again for future submissions.

We encourage authors of original research papers to share the research objects – including raw data, methods, protocols, software, hardware and other outputs – associated with their paper. More information on how our open access Research Elements journals can help you do this is available at <https://eur01.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.elsevier.com%2Fauthors%2Ftools-and-resources%2Fresearch-elements-journals%3Fdgcid%3Dec%20em%20research%20elements%20email&data=05%7C01%7Ctery.setiawan%40ru.nl%7C555a676a673c401d6a5108dba963be68%7C084578d9400d4a5aa7c7e76ca47af400%7C1%7C0%7C638290018090346868%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTil6Ik1haWwiLCJXVCi6Mn0%3D%7C3000%7C%7C%7C&sdata=jro3w8aR7U3vmuOL2VW6vzvTwlSuyLG%2FMIBdmDVWRD4%3D&reserved=0.>

This journal uses the Elsevier Article Transfer Service. This means that if an editor feels your

manuscript is more suitable for an alternative journal, then you might be asked to consider transferring the manuscript to such a journal. The recommendation might be provided by a Journal Editor, a dedicated Scientific Managing Editor, a tool assisted recommendation, or a combination. For more details see the journal guide for authors.

Title: *Psychometric properties of Indonesian slums dwellers' place attachment*

Reference: *HLY_e19704*

Dear Mr. Setiawan,

Congratulations on the successful publication of your article

Psychometric properties of Indonesian slums dwellers' place attachment in *Heliyon*.

Thank you for your contribution to the journal and we hope you will consider submitting an article to an Elsevier-published journal again in the future.

As a commitment to improving our service to Authors, we would like to invite you to participate in our Author Feedback Program. You will receive an e-mail invitation to complete an online questionnaire from Elsevier, asking you to evaluate our performance. Your opinion is very important to us and will enable us to monitor and improve our services for authors.

Please note you will not be sent a questionnaire if you have received an author feedback questionnaire from us within the last 3 months or have previously informed us that you do not wish to receive a survey.

Thank you in advance for sharing your feedback with us!

Yours sincerely,

Elsevier Researcher Support
