## The Challenges Faced by the Information System in the Era of Industry 4.0 and Their Impact on Information Quality

In *Proceedings of the 2nd Maritime, Economics and Business International Conference - Volume Sustainable Recovery Green Economy Based Action*, 195-205, 2023, Tanjungpinang, Indonesia

Authors: Fahmi Suhenda ; Anastasya Candra and Rapina Rapina

Affiliation: Department of Accounting, Maranatha Christian University, Bandung, Indonesia

Keyword(s): Internal Control System, Personality Characteristics, Organizational Structure, and Business Process Quality.

**Abstract:** The importance of business process quality is widely recognized, it is a complex concept with significant weight. When the quality of this process is poor, it has the potential to cause the information system to fail and, as a result, contribute to a decline in the quality of information. The purpose of this research is to investigate and assess the impact of internal control systems, personality characteristics, organizational structure, and business process quality on the quality of the accounting information system, as well as the impact of accounting information system quality on the overall quality of accounting information. The survey questionnaire was filled out by 80 participants using purposeful sampling, a non-random sampling technique. A variance-based structural equation model (SEM) was used to analyze the collected data. SEM is a statistical method that is commonly used to analyze variable relationships and test hypotheses in complex models. The research's primary finding (More)
