<b>Expertise:</b> Explain your rating by discussing the strengths and weaknesses of the submission, contributions, and the potential impacts of the paper. Include suggestions for improvement and publication alternatives, if appropriate. Be thorough. Be fair. Be courteous. Your evaluation will be forwarded to the authors during the rebuttal period.					
<b>Comments:</b>  The topic is good for studying. Has a novelty. Need to improve a lot on literature as very little evidence of literature is included. The knowledge gap needs to be shown clearly. Results and discussions should be clearer than this. Direction of the discussions has to be aligned with the main topic.  Some relevant papers published in <i>International Journal of Computer Theory and Engineering (IJCTE)</i> - <a href="https://www.ijcte.org/">https://www.ijcte.org/</a> are recommended for the authors to enrich the references, such as: <ul style="list-style-type: none"><li>• F.
