Perancangan Kursi Roda Terapi untuk Penderita Stroke

Secara keseluruhan, manuskrip dituliskan dengan baik. Penulis menggunakan metode Design Thinking untuk merancang kursi roda terapi. Penelitian sebelumnya mengenai perancangan sudah dibahas, tetapi sebaiknya ditambahkan juga pembahasan penelitian sebelumnya mengenai perancangan (tidak harus untuk kursi roda) dengan menggunakan metode design thinking.

Penulis sudah membuat prototype tetapi pada bagian akhir manuskrip menuliskan tahapan selanjutnya yang berupa pembuatan prototype. Jelaskan perbedaan antara yang sudah dibuat dan potensi untuk penelitian selanjutnya. Selain itu, penulis juga perlu membahas efektivitas dan kenyamanan dari prototype yang sudah dibuat.

Abstrak perlu direvisi karena kalimatnya sama persis dengan paragraf awal di Pendahuluan.
