BAKI

The concept of this Tray-Meal Box is to anticipate the virus and germs spreading during the pandemic of COVID-19 based on the current situation in the airplane. The specific time chosen for the entire service is during mealtime. There are two unavoidable circumstances in airplane service: **long flight hours due to the distance** and **limited space for the passenger to move**.

These two situations lead us to change the way of serving the meal and the direct contact utilities (tray) from the flight attendants to the passenger and vice versa.

Box	: 250 mm width x 392 mm long x 44 mm height
Rubber sheet	: 252 mm width x 398 mm long x 0.2 mm thickness

(<http://asm.matweb.com/search/SpecificMaterial.asp?bassnum=MA6061T6>). The treatment for this tray frames, using welding or hot forgings, with the 1 mm thickness
