The reviews are below or can be found at [1571084940](#).

Review 1

Comments: Comments and Suggestions for Authors

A very abstract title. The term financial attitude is rather subjective. Discussions are superficial, hence clarity is required in the introduction. Overall a good topic.

Review 2

Comments: Comments and Suggestions for Authors

The study has a small sample size of 31 single mothers, which limits the ability to generalize the findings. A larger sample would help in ensuring the results are more representative and reliable. How participants were selected, please explain it Explain the rationale for choosing a 7-point Likert scale in this study The literature review covers relevant studies; however, the explanation of how the current study fills the gaps in existing research could be more explicit

Regards,

ICMaM 2024

TPC Chair
