<p>   RUBELLA DAN KEHAMILAN</p>
<p>===</p>
<p>Bila ketika hamil anda terserang ruam, periksakanlah ke dokter sesegera mungkin agar penyebabnya dapat diidentifikasi dan semua resiko pada janin dapat diperiksa. Kebanyakan, sakit karena virus tidak beresiko. Namun, virus penyebab rubela (campak jerman) bisa menyeberangi plasenta dan membahayakan janin. Hal ini bisa berakibat buta, masalah jantung ataupun tuli. Resiko kelainan seperti ini lebih rendah bila infeksi terjadi diusia kehailan lanjut ketika pertumbuhan sudah lengkap. penyakit ini dapat dicegah dengan imunisasi, yang dilakukan berkala diusia anak-anak. Namun imunisasi tidak selalu memberikan perlindungan permanen, dan sebagai langkah kewaspadaan yang penting sebelum berusaha hamil, anda harus menjalani tes darah untuk memeriksa kekebalan, dan diikuti dengan imunisasi jika perlu. </p>
