

### Causes

1. The 3-year-old child attention span is still very short.
2. The 3 years old child older sister in the same classroom but in a different level.
3. The three-year-old child looks for adult attention.
4. The three-year-old child prefers playing to studying.

### Positive

1. The child becomes more enthusiastic in studying.
2. To build the child's confidence.

### Positive

1. The child becomes obedient to me in the class, because she has respect for me as the adult in the classroom.
2. The teacher can teach the materials more optimally because the 3-year-old child is willing to cooperate in the class.

### Positive

1. The child is interested in studying because she can play and study at the same time.
2. The 3-year-old child will be easier to teach because she likes to play.

### Problem

Difficulty in Handling  
A 3-Year-Old Child  
in KIDS2SUCCESS  
English Course

### Solution 1

The teacher  
gives praises to  
the 3-year-old  
child.

### Solution 2

Teaching the 3-  
year-old child to be  
disciplined.

### Solution 3

I as a teacher give  
a lot of playing  
activities while  
teaching the 3 –  
year-old child

### Effects

1. The teaching materials for the day could not be delivered successfully.
2. The other children in the classroom felt annoyed, including Andini's sister.
3. Frustration for the teacher.

### negative

1. I can make this 3-year-old child become spoiled.
2. The child becomes a retainer.

### negative

1. The child cries because she thinks I am angry at her.
- 2 The child thinks the teacher is a cruel person.

### negative

1. As the teacher I feel tired because when I do a lot of playing activity, it means I have to provide more energy to play with her.
2. The child will only enjoy playing activity, but do not want to sit down on the chair to listen to learning materials like memorizing and listening.

## Chosen Solution

Giving a lot of playing activities while teaching the 3-year-old child.
