FLOW CHART

Causes
1. teacher is not familiar with the film
2. teacher does not explain about the film first
3. teacher does not prepare teaching material

PROBLEM
The difficulties of a new teacher teaching English to children aged 6-8 through film

EFFECTS
1. students only learn few of English vocabularies
2. students become not interested in watching the assigned film

positive effects
1. students can learn better
2. the teacher can reach the study objective

POTENTIAL SOLUTION 1
Choose the suitable film appropriate with the objective of the study

Negative effects:
1. students may not enjoy the film
2. they might not understand the film

Positive effects:
1. teacher knows how to teach a lesson by using the film
2. teacher can control the class in good arrangement
3. students can focus while watching the film

POTENTIAL SOLUTION 2
Preparing the teaching material

Negative effects:
1. students do not listen to the instruction
2. the film become less fun

Positive effects:
1. teacher can know whether they understand the movie or not
2. teacher can check particular students' skills, e.g. listening, speaking, etc
3. the exercise can help students do self-study

POTENTIAL SOLUTION 3
Give students exercise only after they watch the film

Negative effects:
1. students can't answer the questions in English
2. students don't want to do the exercise

CHOSEN SOLUTION
Choose a suitable film & Prepare all the material before watching the film
