

CHAPTER V

CONCLUSION

After analyzing the potential solutions to solve the problem, I believe that applying these three solutions together is the best solution. All of the solutions support each other. Pair work and small group work are useful and efficient for students' learning process. Pair work and small group work can be done effectively in a class arranged by applying Arrangement A. Arrangement A makes the teacher organize the students more easily. The students work in pairs or in small groups of mixed-levels. The students of different levels will be able to sit in the same group so that they can help each other to do the exercises.

By using all of the solutions together the students will also be more interested in following the lessons because they will do the exercises together. Also they will understand the lesson better because they do not feel bored to work in pairs or small groups. So, the three solutions together can make the learning process going well.
