

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

V.1. THE CONCLUSION

The result of the investigation shows that even though Rumah Batik Komar applied quite many of English that does not follow the rules of “good” English but still it is able to protect their image, maintain their business and improve the business. Based on the result above I can conclude two things. First thing is that the theories in the chapter 2 are proved not entirely right by the facts in the field because even without a well use of “good English” it still has some improvements. Second thing is, if a quite well use of “good English” could bring profit, Rumah Batik Komar should consider to apply more of “good” English in the future to bring healthier impacts to business.

V.2. SUGGESTIONS

I suggest Rumah Batik Komar to apply the theories of “good” English better in the future, so that Rumah Batik Komar could gain more business partners and profits.
