

ABSTRACTION

Looking at economic growth in the city of Bandung, most economies are influenced by trade and services sector. The sector is a driving force for economic growth in the city of Bandung. Therefore, many office building are built to fulfill needs of trade and services. This has opened up many opportunities for people to careers in that field. Therefore, many was built-office building office building to fulfill needs of trade and services sectors. As a result of economic growth, the started to appear class differences in society, in terms of career structure and level of the economy. Communities with high career position and level of upper-class economy is often referred to as the executive. The executive often experience the stress or boredom in work so they need entertainment to relieve stress. Entertainment that they enjoy doing not much different from the entertainment favored by middle-class, but with the quality or higher standard. Because it is entertainment made for the executive to be more exclusive than the middle class.
