

CHAPTER IV

CONCLUSIONS

In this chapter, I would like to discuss the chosen solutions for my problem which is difficulty in teaching most of third grade students class A who could not memorize English vocabulary. There are four causes of the problem namely I did not use suitable techniques to make them remember English vocabulary easily, I lacked of experience in teaching vocabulary, the students did not have a relevant English course book, and the frequency of English lesson was only once a week. Moreover, the effects of the problem are almost all children got bad marks on English quiz, the progress learning of English lesson was slow, and I lost my temper when teaching the students in the class. To solve the problem, there are four potential solutions. First, I will use games to teach vocabulary. Second, I will use flash cards to teach English vocabulary to the students. Third, I will give some copies of English vocabulary handout to the children. Fourth, I will offer an extra class after school twice a week.

Combining all of the four potential solutions will be the best solution to solve my problem. Applying all potential solutions will be effective to deal with all causes of the problem. First, I will use an interesting teaching technique such as flash cards and games, so that the students will be interested in learning vocabulary. Second, I will give some copies of vocabulary because the students do not have a relevant course book. Third, I will give an extra English class, so that the students will learn English lesson more than once a week. If I only use flash cards and games without giving handouts and extra English class, the result of the learning will not be effective.

I have some suggestions for the teachers at SDN 3 Pasir Panjang that the teacher at SDN 3 Pasir Panjang should teach the students with flash cards and games to make the students interested to memorize vocabulary. In addition, the teachers also should give some handouts of vocabulary and give an extra class to make the students memorize English vocabulary better. I believe that being a teacher should be creative, so that the students will be motivated to memorize English vocabulary.
