CHAPTER I

BACKGROUND

Indonesia is a rich country which has many kinds of natural resources. The example of Indonesia’s natural resources are many kinds of fruits like green apple from Malang, arum manis mango from Probolinggo, tomato, strawberry, melon from West Java, and lime from Northern Sulawesi. Most of the fruits have been found in beverage industry. However, Limez wants to introduce its special innovation that is lime mixed with herbs or other fruits based on family recipe.

Limez is a beverage stand which uses lime as its main ingredient. According to “Our Refreshments” (par.1), “lime is synonymous with freshness”, Limez is expected to offer the consumers the taste of the freshness through a glass of original taste lime mixed with sweet sugar to eliminate exhaustion. Besides the original taste of lime, Limez also provides beverages from aloe and pineapple for consumers who like sweet taste, and ginger for consumers who like hot taste.

In addition, Limez provides combining taste of sour and sweet or sour with hot by combining lime with aloe, pineapple, or ginger. However, Limez’s main menu is the combination of those ingredients that creates sweet, sour, and hot altogether in a glass of beverage. All Limez’s beverages can be served cold or hot. They are also safe because they do not contain
preservative and have already been known among society as the natural
Indonesian ingredients that have health benefits.

Lime has a number of health benefits. They are effective in blocking the
formation of kidney stones and in healing wrinkled skin, influenza, cough,
fever, constipation, late menstruation, stomachache when menstruation, and
body odor because lime contains high vitamin C, calcium, vitamin B1, iron
substance, protein, fat, and water (Wirakusumah 46).

Besides lime, the consumers can also get additional benefits from aloe,
pineapple, and ginger as its complementary ingredients. The health benefits
of these ingredients are as follows:

- **Aloe**

  Astawan (par. 11, 24) states that aloe contains vitamin A, B1, B2, B3, B12,
  C, E, choline, inositol, calcium, magnesium, potassium, sodium, iron, zinc,
  and chromium. Therefore, aloe can alleviate heart attack, cholesterol,
  constipation, cough, sore throat, diabetes, hepatoprotector, and
  immunomodulator.

- **Pineapple**

  According to “Nanas” (par. 5, 17, 18), pineapple which contains vitamin A
  and C, calcium, fosfor, magnesium, iron substance, natrium, kalium,
  dekstrosa, sukrosa, and bromelain enzime is effective to overcome
  constipation, sore throat, blood coagulation, atherosclerosis, late
menstruation, block tumor growth, increase medicine absorbent, and reduce weight.

- Ginger

Koswara (par. 10) says ginger contains protease enzyme, lipase enzyme, and gingerol so ginger is effective to alleviate high pressure, help food digestion, and neutralize evil free radical inside our body.

**Limez** is a profitable business. Its initial investment is only Rp4,031,400 and its operational cost is only Rp15,489,400 a year. The break even point can be reached after selling 1,811.66 units. All of the expenses can be returned in less than a year.

Although in beverage industry the competition is very tight, as can be seen through the number of juice sellers and other kinds of beverage sellers in Jalan Raya Cimahi area, **Limez** has a good prospect since none of the juice sellers use similar ingredients and concept. Besides, **Limez** focuses its attention on consumer satisfaction by using good quality ingredients and processed in a hygienic way. Moreover, **Limez** is supported by its employees who serve the consumers in polite and friendly manner as it is one of the Indonesian customs to give optimal service. Furthermore, **Limez** provides annual promotion to remind consumers of the products and at the same time get new consumers.

At Istana Plaza Bandung, there is a beverage seller that uses fruits mix and fruit and herbal mix concept like **Limez** named N’ERGY. However, there are many differences between **Limez** and N’ERGY. **Limez** uses Indonesian
concept and Indonesian ingredients while N’ERGY uses Australian concept and Australian ingredients. Besides, Limez and N’ERGY have different target market, price, and are not in the same location. In addition, Limez’s beverage can be served both hot and cold while N’ERGY’s beverage can only be served cold.

The further information of Limez’s business profile is as follow:

**Type of Business**

Beverage stand

**Stand’s name**

Limez

**Stand’s address**

Jl. Raya Barat 288 Cimahi

**Phone number**

(022) 91776424
