

## ABSTRAK

Sistem pelayanan *invoice online* adalah sebuah *web based application* yang dapat melakukan pengelolaan *invoice* menggunakan teknologi internet. Pemilihan jenis aplikasi berbasis web agar dapat digunakan oleh banyak pengguna di seluruh dunia serta dapat dengan mudah diakses dimanapun dan kapan pun. Seiring perkembangan teknologi internet yang semakin pesat banyak digunakan oleh berbagai kalangan dan untuk segala macam aktifitas manusia.

Pengelolaan meliputi pembuatan dan pengiriman *invoice* kepada pihak yang terkait. Pihak terkait adalah *person* dari sebuah *company*, dan pengiriman *invoice* melalui email kepada *person* ini. Sistem ini dibangun agar semudah mungkin digunakan user untuk dapat memberikan kenyamanan meskipun baru pertama kali menggunakan.

Sistem pelayanan *invoice online* ini memungkinkan seseorang atau badan mengirimkan *invoice* untuk kebutuhan pembuatan bukti transaksi, karena tidak semua orang menyediakan sendiri *invoice* untuk kebutuhannya. Untuk itu, diperlukan sebuah sistem penyedia *invoice* yang dapat dengan mudah dan cepat digunakan dalam berbagai kebutuhan pengguna.

Aplikasi pelayanan *invoice online* ini dibangun dengan menggunakan bahasa pemrograman ruby, framework ruby on rails, dan database mysql.

**Kata Kunci : *invoice, ruby, ruby on rails, internet, mysql.***

## ABSTRACT

*Online Invoice services system is a web based application which can manage invoice using internet technology. Choosing type the web based application is just people everywhere in the world can easily used this application and anytime they want. As growth as internet technology rapidly everyday have been in general use a variety of realm and used of all kinds people activity.*

*Managing invoice include creating and sending invoice for the relevant parties. The relevant parties is a person or people from a company, and the invoice send using email to this person or people. This system developed for used easily by user so it can give pleasure though it used for first time around.*

*This online invoice services system make possible someone or corporation sending invoices for creating transactions evidence, that not all people have their own invoice system. For that, invoice system is needed to fast and easy used for any kind human needs.*

*This online invoice services application developed using ruby programming language, ruby on rails framework and mysql database.*

**Keyword : invoice, ruby, ruby on rails, mysql.**

## DAFTAR SIMBOL

SIMBOL	NAMA SIMBOL	KETERANGAN
	<i>Actor</i>	Pelaku kegiatan sistem atau pengguna suatu sistem. Dapat berupa orang atau sistem lainnya. Dalam pemberian nama <i>actor</i> hendaklah diberikan nama yang menggambarkan fungsinya dalam sistem, jangan menggunakan nama aslinya.
	<i>Use case</i>	Inisialisasi kegiatan dari sistem yang akan dibuat. Merupakan kegiatan yang dilakukan oleh actor dalam sistem.
	Decisions	Pemilihan keputusan apabila proses yang terjadi meminta sebuah pemilihan jenis keputusan, sehingga proses dapat terjadi lebih dari satu.
	<i>Initial state</i>	Inisialisasi state pertama kali memulai suatu proses.
	<i>Final state</i>	Inisialisasi state berakhirnya suatu proses.
	<i>Action state</i>	Proses yang dilakukan.
