ABSTRACT

PT. Fumira is a company domiciled in Java Road, Kav. A-1 MM 2100 Industrial Estate, Cibitung, Bekasi, West Java. PT. Fumira is a manufacturing company engaged in the metal industry with the results of the primary production in the form of zinc coated steel and zinc coated steel color. At this time, PT. Fumira still do recording data and the performance appraisal leave application manually, causing difficulties in recording data leave application performance assessment and employee data due to the many and the number of transactions and the leave application performance assessments conducted by many companies. This research was conducted with the aim to produce a desktop-based application that can help PT. Fumira to record data and performance appraisal leave application that is integrated with the database. The data source for the creation of applications obtained from the debriefing employees of the company, books literature on theories that are needed, and various sources on the Internet for reference. With the making of this application, the data processing is more efficient and can save a lot of time in the search for performance appraisal data and leave application PT. Fumira.
