Causes of the problem:
1. The student lacked confidence.
2. Teacher did not have a good relationship with the student.
3. The teacher was not enthusiastic in teaching.

Problem:
A student who was not motivated to learn in Grade 2 at Bestari Utami Elementary School

Effect of the problem:
1. The student was not active in class.
2. The student had poor study results.
3. The student easily gave up on learning challenges.

Potential Positive effect:
1. The student will be more motivated to learn in order to achieve his target.
2. The student will have specific, realistic target

Potential solution 1:
Help the student set a goal which he considers achievable

Potential negative effect:
1. The student may set higher goal than what he is actually capable of.
2. The student may set the grade target lower than his ability
3. The student compares his grade target with the other students

Potential Positive effect:
1. The student will have more motivation to learn.

Potential solution 2:
Give the student a reward when he shows study progress.

Potential negative effect:
1. The student will be serious and motivated only when there is a reward
2. The student will not help one another during learning process.

Potential Positive effect:
1. The student will be more enthusiastic to learn.
2. The student will be more comfortable to learn in class.

Potential solution 3:
The teacher builds a good relationship with the student.

Potential Negative problem:
1. It takes a long time to build a good relationship

Chosen Solutions:
1. The student sets a goal which he considers achievable
2. Gives the student a reward when he shows study progress.
3. The teacher builds a good relationship with the student.
