Problem:
the difficulty in helping four-year-old students to learn and memorize new English vocabulary

Effect 1: I needed more effort and time in preparing the material to help the children to memorize the vocabulary
Effect 2: Some students were unwilling to follow the material in class because they found it difficult to keep up
Effect 3: Some students did not enjoy learning English.

Potential Negative Effects:
1. some of the students may get bored and underestimate the lesson.
2. Learning process runs slowly.

Potential Positive Effects:
1. The children will find it easier to remember the new words through playing in a fun atmosphere.
2. The class will not be boring.

Potential Solution I:
The teacher facilitates the students to listen and say the words a couple of times through different activities.

Potential Positive Effects:
1. The teacher can make sure if the children have memorized the vocabulary or not
2. the students can enjoy learning the words they are familiar with.

Potential Solution II:
The teacher provides various, interesting activities such as employing pictures and games in class.

Potential Positive Effects:
1. they are trained to improve their memory in the form of test.
2. they will be motivated to answer the test because they will get the reward.

Potential Solution III:
The teacher gives a test and a reward for the students who can answer correctly

Potential Negative Effects:
1. some children may become afraid of the test and do not like English lesson due to the fact that it makes them get stressful.
2. the children who do not remember and cannot answer the test may ignore the words.
