The problem of my term paper is I had difficulty in teaching a second-grade student who had a problem in memorizing English vocabulary at SD Sirna Sari Pangalengan. There are three causes of the problem, including I had lack of experience in teaching vocabulary, I did not provide any creative activities to teach vocabulary and I did not give the student a motivation to learn harder through rewards. The effects of my problem is I had to give more time to the student and less time for other students, I lost my temper and she got bad result. There are three potential solutions to solve the problem. The first potential solution is I should use fun activities to teach, such us word games, songs and pictures. The second potential solution is I will give the student extra tutorials after class. The third potential solution of my problem is I will use repetition as my teaching technique in teaching vocabulary.

Based on the analysis in the previous chapters, I would like to choose all three of my solutions to solve the problem. The first solution is I will use fun activities to teach such us word games, songs and pictures. Most students in
the second-grade seem to like fun activities; thus, using fun activities to teach vocabulary to the student will be more efficient to help the student memorize the English vocabulary. The second chosen solution is giving the student extra tutorials after school. Giving extra tutorial to the student after school not only could help the student to memorize the words easily but also it could make me know why the student finds it hard to memorize the English vocabulary. By knowing what the student main problem is, I can apply suitable techniques when teaching her. Thus, the student can memorize the words better. The third is I will use repetition to teach the student. By repeating the vocabulary, the student can memorize the English words better because it makes the words seem more familiar for the student. Therefore, it is highly likely that the student can memorize the words better.

To sum up, using fun activities to teach English vocabulary, giving extra tutorials and using repetition are effective to help the student memorize the words better. I expect the chosen solutions could help other teachers who have a similar problem as well.
